However, more complicated relationships between the number of opinion dimensions and bi-polarization arise when models differentiate between a primary and secondary opinion dimension, where the primary dimension mainly defines whether influence is assimilative or repulsive on both dimensions Huet and Deffuant In addition, repulsive influence models appear to be sensitive to the network structure: networks with strong local clustering and small average distances between nodes caveman graphs display a strong polarizing tendency originating from long-range ties. Also based on the respect for the freedom of belief is the rejection of trends that exclude others, condemn their beliefs and label them as disbelievers amid attempts to examine the inner thoughts of those who hold those beliefs.
